New York Situation.

New York Situation.

The following analysis of the New York market situation was received yesterday by W. B. Hibbs & Co., from Logan & Bryan, their New York correspondents:

"The tremendous foreign and domestic demand for American products, the huge corporate earnings and the stimulating 180% effect of the vast accumulation of gold conduce to exert a pronounced effect on industrials in the shape of fostering an insistent public demand for securities of that type, so that until the outside appetite is more fully satisfied, opinions as to the extent of rises are not of much value, However, the inflation will have to be regulated before long."
